Form 2207

Dresser-Rand vital parts kits for single- and multi-stage steam turbines keep all of a steam turbine's vital wear parts in a single kit sturdy enough to provide years of service in various environments.

The vital parts kit will help reduce costs by:

- Protecting and safely transporting parts to the work site
- Improving productivity during repair procedures
- Simplifying monitoring and controlling inventory.

The vital parts kit box allows for safe storage and transportation of parts, and the bright case color makes these kits highly visible. Made out of a durable, high-impact plastic with molded-in handle and locking clasps, the kit box is designed to be as reliable as the parts themselves. The foam-padded compartments keep parts organized and easily accessible. Having one vital parts kit box for each unit helps speed inventory of the parts most needed. Keep vital parts kit complete and ready for every scheduled maintenance with the convenient reorder forms included in the kit box.

The kits are turbine-specific, and can be created for multiple units. They're available for single-stage models RLA, RLHA, RLVA, and SST; and for multi-stage models R, K, and U.

For more information or to order a vital parts kit, contact your local Dresser-Rand representative, or call:

(For single-stage steam turbines)
US toll free: 888-876-8726
International: (Int'l +1) 508-595-1700
