

Dresser-Rand® Gimpel™ Valve Solenoid-Exerciser Kit

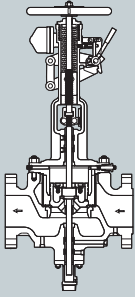

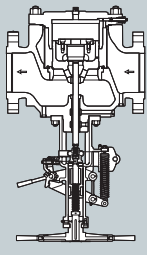

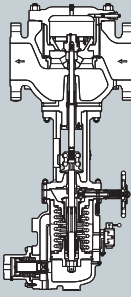

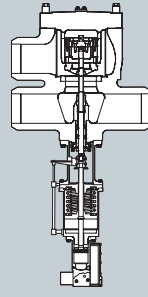

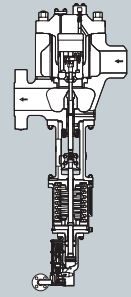

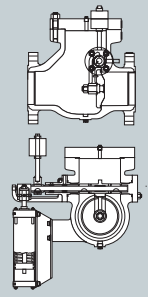

Oil-operated trip-and-trip throttle valves equipped with a local manual exerciser can be retrofitted with a solenoid-powered exerciser that provides local and/or remote exercising capability. A solenoid exerciser can be programmed into a distributed central system (DCS) for fully automated valve exercising. Dresser-Rand recommends weekly exercising of all trip and trip-throttle valves.

A Solenoid Exerciser Kit includes:

- Solenoid
- Adapter plate
- Mounting hardware
- Instructions

Gimpel™ Valve Matrix
